

SUBMISSION OF AFFIDAVIT UNDER 37 CFR 1.132

Please enter in the Application file the accompanying Affidavit of David Paull under 37 CFR 1.132.

REMARKS

The Specification is amended to correct the missing information noted by the Examiner. Main Claims 1 and 15 are amended to define the subject matter of the present invention so as to be more clearly distinct over the prior art cited by the Examiner. The Affidavit of David Paull is submitted in support of Applicant's position that the cited prior art did not teach or suggest the method as now more clearly defined in amended Claim 1, of intercepting the display output signal from the 3D application software intended for a native display driver for a 2D display device and instead invoking a pseudo driver to produce separate right and left image view signals which are provided to separate graphics rendering devices operated in tandem to generate right and left image view display outputs for a 3D stereoscopic vision display device, and in amended Claim 15, of a 3D multi-view display system for practicing the referenced interception method by providing the 3D stereoscopic vision pseudo driver linked to the native API display driver intended for a 2D display device and generating multiple, separate views for rendering in parallel by corresponding multiple graphics rendering devices. Claim 6 is canceled. The other Claims 2-5 and 7-14, and Claims 16-20 depend from Claims 1 and 15, respectively, and are patentable on the same grounds. Claim 19 specifies the preferred embodiment of Claim 15 wherein the 3D multi-view display is constituted by the right and left image views of a 3D stereoscopic vision display. It is requested that a Notice of Allowance therefore be issued upon reconsideration.
